# POINTS FOR ATTENTION

Attention: To reduce the risk of fire and electric shock, do not expose this unit to rain or moisture.

## CAUTION:

To reduce the risk of fire and electrical shock, do not remove the cover of this unit. Please refer all servicing difficulties to qualified technicians. This lightning flash arrow symbol in a triangle, is intended to alert users to the presence of non-insulated high voltage within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to person. The exclamation point symbol in a triangle is intended to alert users to the presence of important operating and maintenance instructions in the literature accompanying the unit.

## CLASS1:

LASER PRODUCT - This marking indicates the presence of laser beams used in this unit, and CLASS 1 refers to laser beams of the weaker class. There is no danger of hazardous radiation outside this unit.

## IMPORTANT NOTICE:

REFER SERVICING ONLY TO QUALIFIED SERVICE PERSONNEL

- Read through this instruction manual before installation and use.
- To disconnect the power cord, hold the plug instead of pulling on the cord.
- Switch off the main power when the unit is not in use. (Disconnect the power plug from the power outlet when you do not intend to use the unit for a prolonged period of time.) Before moving the unit, remove the disc from the unit's tray first.
- Do not open the cover or touch any of the components inside the unit.
- Do not operate or install the unit under direct sunlight or near objects that radiate heat. This may lead to overheating of the unit.
- Do not operate or install the unit in moist or humid conditions. This may affect the pick-up of the unit.
- Install the unit on a flat surface with good air circulation. Please ensure the ventilation holes are not covered otherwise the unit will overheat and malfunction.
- Wipe the panel and case with soft dry cloth only. Do not apply any kind of thinner, alcohol or sprays when cleaning the unit.

## REMOTE CONTROL OPERATION:

\* remove battery cover

\* insert batteries

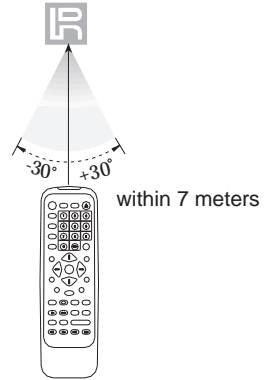

\* close the battery cover

## CARE OF REMOTE CONTROL:

- Aim remote control at remote sensor of DVD.
- Do not drop the unit from a high position or cause high impact
- Do not place the remote control in hot or moist environments
- Do not splash water or any other liquid on remote control

\* point remote control directly to the remote sensor

• Distance:

the remote control works best within 7 metres from the DVD player

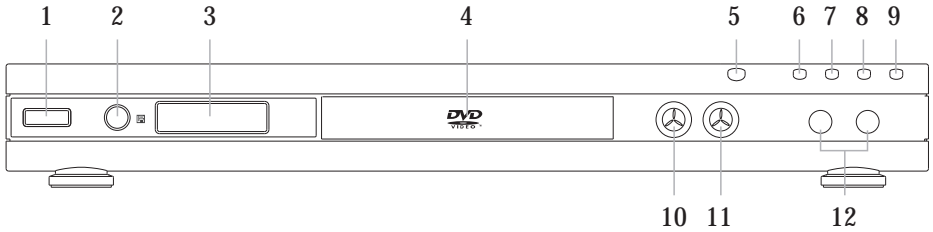

• Do not expose the remote control sensor directly to a heat source or it will malfunction

## TYPES OF DISCS THAT CAN BE USED:

# OPERATION INTERFACE

## VIDEO SYSTEM CONNECTION:

- The unit supports three choices of video output: composite video, S-video, and Component video output. Component video output obtains the best picture quality, followed by S-video.

- Composite video output:  
Connect the AV cable (yellow) to the video output (yellow) of the unit and to the video input of your TV or monitor.

- S-video output:  
Connect a S-video cable (not included ) to the S-video output of the unit and to the S-video input of your TV or monitor.

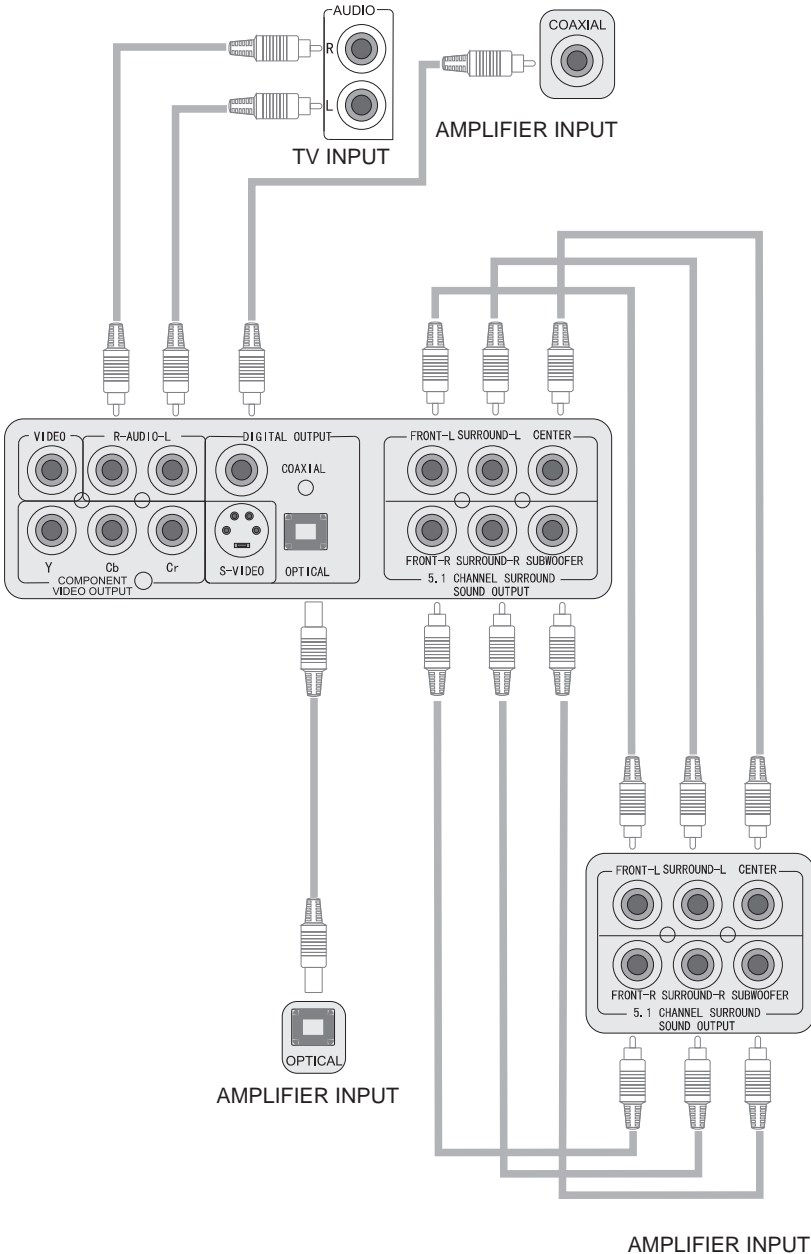

- Component video output:

Connect a component video cable (Cb,Cr,Y) to the component video output of the unit and to the component video input of your TV or monitor. Cart input of TV or monitor.

- Note:  
Select the type of audio output in the menu depending on the type of connection that is used.

To get a better picture effect, these four methods can not be applied simultaneously.

## AUDIO SYSTEM CONNECTION:

# OPERATION INTERFACE

- The unit supports two choices of audio output: Analogy audio and digital audio.

Analog audio includes stereo 2 channel and 5.1 channel. Digital audio includes optical and coaxial output. Digital audio obtains a better effect than analog.

- Stereo Output:

Connect with audio output jack for the mixing audio of the unit and the stereo input of TV or amplifier by audio cable.

- 5.1 channel output:

Connect with 5.1 channel output of the unit and corresponding input of amplifier by audio 5.1 channel cable.

- Coaxial output:

Connect the Digital coaxial cable to the coaxial output of the unit and the corresponding input of amplifier.(with digital coaxial inlet)

- Optical output:

Connect the Toslink optical cable to the optical output of the unit and the corresponding input of amplifier.(with digital optics inlet).  
stereo input of TV or amplifier.

- Each connection must match to the internal setup of the unit. Please refer to the unit and the connection equipment before connection.

- DVD player supplies a wide dynamic range of frequencies so the amplifier volume must be suitable levels or the speakers may be damaged from sudden bursts of high volume sounds.

- During the operation, please power off amplifier before power on/off DVD player, the speaker may be damaged.

## Setup Before Operation:

Before operation, please make sure the following setup is correct.

- Audio Output:

The unit has four choices of audio output: 2 channel, digital, 5.1 channel and stereo PCM. Select different setup depending on your connection. For more information, please refer to system setup.

- TV System:

Select the corresponding system depending on your TV system. For more information, please refer to system setup.

- Video Output:

The unit has three choices of video output: composite video, S-video, component video output. Select different setup depending on your connection. For more information, please refer to system setup.

- Note:

DVD disc can support different scale of pictures. Maybe picture is not full screen or part of picture has been blocked.  
The manual refer to English OSD.

When play the grade control disc, press

parental to select grade.

Reset the setup mode to the preference.

## SYMPTOM AND SOLUTION:

When having problem with the unit, please check this list for a possible solution before asking for service.

Symptom	Reason(s)	Solution(s)
No power	Do not connect power cord to the wall outlet	Connect them well
No picture	Do not set up TV in correct setting	Set up TV in correct mode
	Do not connect video cable securely	Connect them well
No sound	Do not connect audio cable securely	Connect them well
	Do not power the audio connection system on	Power it on
	The audio output setting is not correct.	Set it in correct mode
Distorted picture	Disc is dirty.	Clean the disc or try another one.
	In fastforward or fastbackward mode	Sometimes, the tiny distortion appears, it's normal condition.
Luminance unsteady or picture with noise	Circuitry influence	Connect DVD video player to TV directly
Unable to play	Do not load disc in	Place disc in
	The disc loaded in can not play	Place readable disc in (check the disc type)
	The disc is loaded upside down	Replace the disc with the label side up
	Do not load disc in guide slot	Load the disc correctly
	Disc dirty	Clean the disc
	TV screen has menu	Press Setup turning off the menu.
	Parental lock function	Unlock it or change the rating
Key no function	Power wave or other abnormal phenomena (such as static) disturbs the normal condition.	Switch on/off power or unplug/replug the power cord.
Remote control does not work	Do not point remote control at the remote sensor directly.	Point remote control at the remote sensor directly.
	Remote control is too far from DVD unit.	Operate remote control within 7 meters
	Batteries are exhausted.	Replace the batteries and insert in correct polarities.

# SPECIFICATIONS

## DVDPLAYER/OUTPUT:

### DVD Player

Power Supply	~90-240V AC 50/60Hz
Power Consumption	25W
Weight	3.1Kg
Dimension	430x50x250mm(W/H/D)
Video System	NTSC/PAL
Optical read-out system	Semiconductor AlGaAs Weam, wave length: 650nm,780nm
Audio Frequency Response	DVD audio: Fs 48KHz PCM 4 Hz~22Hz Fs 96KHz PCM 4Hz~44KHz Audio CD Fs 44.1Hz 4Hz~20KHz
S/N Ratio	>90dB
Audio Dynamic Range	>90dB
Rotating Ratio	Within measurable range
Operation Condition	Temperature 0°C ~ 40°C; Operation status: horization

### Output

Video Output	1.0 V(P-P), 75 Ω
S-video Output	(Y) 1.0V (P-P), 75 Ω (C) 0.286 V (P-P), 75 Ω
Audio Output(Analog Audio)	2.0 V(rms)

# ADDITIONAL INFORMATION

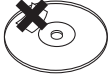

## Care of disc:

---

Do not touch the signal surface.

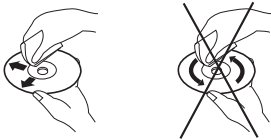

Do not add labels or adhesive tapes on the discs.

## Cleaning of discs:

---

Finger prints or stains on the surface of the disc will directly affect signal recording and result in a poorer picture quality. Therefore, please use a soft cloth and wipe in a radiating manner from the centre to the outer rims when cleaning the disc.

If the surface of your disc is very dirty, wipe the disc with a moist cloth. Finally use a dry soft cloth to remove all the water stains. Never use electrostatic prevention products as well as solutions which contain benzene, thinner or any other vaporizing substances, as they may damage the disc surface.

Storage of disc:

## Storage of disc:

---

Do not keep the disc in the direct sunlight, near the heat source, in the dusty places or moisture (kitchen, bathroom). Keep the disc vertically in the disc storage case. Heavy objects on the disc case will cause deformation to the disc.

## Copyright Attention:

---

Copy, broadcast, play or rent the disc is forbidden without legal permission.

## TV System:

---

Please connect the unit to the TV compatible with PAL/NTSC.

## About this manual

---

This manual explains the basic specifications of this unit. Some DVD disc may have special requirement and the unit may not play such discs. Please refer to the disc instruction.

## TERMS:

---
