Sunbeam's Safety Precautions

SAFETY PRECAUTIONS FOR YOUR SUNBEAM STAINLESS WOK.

- Use well away from walls and curtains.
- Avoid using on metal surfaces e.g. sink, hotplate.
- Do not touch cooking vessel whilst hot, use cool touch handles.

Sunbeam are very safety conscious when designing and manufacturing consumer products, but it is essential that the product user also exercise care when using an electrical appliance. Listed below are precautions which are essential for the safe use of an electrical appliance:

- Read carefully and save all the instructions provided with an appliance.
- Always turn the power off at the power outlet before you insert or remove a plug. Remove by grasping the plug - do not pull on the cord.
- Turn the power off and remove the plug when the appliance is not in use and before cleaning.
- Do not use your appliance with an extension cord unless this cord has been checked and tested by a qualified technician or service person.
- Always use your appliance from a power outlet of the voltage (A.C. only) marked on the appliance.
- Close supervision is necessary when your appliance is being used near children or infirm persons.
- Never leave an appliance unattended while in use.
- Young children should be supervised to ensure that they do not play with the appliance.

If you have any concerns regarding the performance and use of your appliance, please visit www.sunbeam.com.au or contact the Sunbeam Consumer Service Line.

Ensure the above safety precautions are understood.

- If using a plastic spatula do not leave in cooking vessel when hot.
- Do not immerse removable probe in water.
- Do not place hot glass lid under cold water.
- The knob on the glass lid may get hot during use – oven mitts may be required.
- Do not use an appliance for any purpose other than its intended use.
- Do not place an appliance on or near a hot gas flame, electric element or on a heated oven. Do not place on top of any other appliance.
- Do not let the power cord of an appliance hang over the edge of a table or bench top or touch any hot surface.
- For safety reasons and to avoid maintenance by unskilled persons, some appliances are 'sealed' using tamperproof screws. Such appliances should always be returned to the nearest Sunbeam Appointed Service Centre for adjustment or repair if required.
- Do not operate any electrical appliance with a damaged cord or after the appliance has been dropped or damaged in any manner. If damage is suspected, return the appliance to the nearest Sunbeam Appointed Service Centre for examination, repair or adjustment.
- For additional protection, Sunbeam recommend the use of a residual current device (RCD) with a tripping current not exceeding 30mA in the electrical circuit supplying power to your appliances.
- Do not immerse the appliance in water or any other liquid unless recommended.

Features of your Stainless Professional Wok

Glass Lid

Stylish glass lid with stainless steel rim enables you to watch your food while it cooks.

18/10 Stainless Steel Cooking Vessel

Long lasting 25 year guaranteed
18/10 Stainless Steel cooking surface
- essential for the gourmet cook.

2400 Watt 'Heat Wall' Element

The element wraps around the heavy duty base and sides of the wok to provide superior heat distribution.

Unique Cast Element

The element is completely cast into the heavy duty base for longer element life and faster heat up.

Quick Release Detachable Base

Quick-release detachable base allows for easy cleaning. Simply twist the knob and pull to release the 'cook and clean' base.

Non-Slip Feet

Non-slip rubber feet provides extra stability and prevents slipping.

Adjustable Steam Vent

Fixed steam vent controls the moisture level during cooking.

Cool Touch Handles

Makes handling safer when shifting your wok from the kitchen table.

Heavy Duty Die-Cast Cooking Vessel

Dishwasher safe parts

The wok vessel, base and glass lid are dishwasher safe.

Trigger-release Heat Control Probe with 15 heat settings

15 heat settings allow for perfect cooking control, while the simple to use trigger release probe makes for quick easy removal after use.

Tempura rack

The tempura rack allows you to perfect the art of deep frying oriental-style spring rolls, curry puffs, money bags etc.

Steaming Rack

The versatile steaming rack is ideal for fat free steaming of a variety of fresh vegetables, fish and poultry.

Features of your Stainless Wok

2400 Watt 'Heat-Wall' Element

Your Sunbeam Stainless Professional Wok features a special 2400 Watt 'Heat-Wall' element. This element wraps around both the bottom, and side of your wok wall providing superior cooking temperatures and heat distribution.

Completely cast-in element

The heat is quickly channelled from the base of the wok up the wall. This 'Heat-Wall' system creates the ideal wok cooking environment for fast and easy cooking.

Heat-Wall element channels heat upwards

The 'Heat-Wall' element is completely cast into the heavy duty base. This increases the life of the element and provides faster heat distribution.

Trigger-Release Control Probe with 15 heat settings

The Heat Control Probe is thermostatically controlled with 15 settings to deliver perfect cooking control.

The indicator light switches 'on' when it is heating. When the wok has reached the desired temperature the indicator light switches 'off'. The indicator light will then cycle 'on' and 'off' as the thermostat maintains the set temperature.

The Heat Control Probe is ergonomically designed with a handy Trigger-Release. Simply hold the probe and squeeze the trigger with your thumb to remove it.

Using your Stainless Wok

Before the First Use.

Ensure any stickers are removed from the product. Wash in warm soapy water, rinse thoroughly and dry your Wok and lid.

Do not immerse the Heat Control Probe in water or any other liquid.

Seasoning is very important when cooking with Stainless Steel. It will help prevent food from sticking to the base of the wok during cooking.

Season the cooking surface by applying a thin coat of cooking oil and wiping over with paper towelling. Re-seasoning is recommended every few months.

1. Insert the Heat Control Probe into the socket of the Wok.
2. Plug the cord into a 230-240V power outlet and turn the power on.
3. Set the Heat Control Probe dial to the desired temperature setting, or the recommended temperature setting for your required recipe.

Allow 5 minutes for your Wok to reach the temperature setting you have selected. The Wok is now ready to use.

Note: The thermostat light on the Heat Control Probe indicates the temperature at which the dial is set.

This light will remain on until the set temperature has been reached and then will cycle on and off throughout cooking. This will ensure that the Wok maintains the correct temperature.

Stainless steel cooking surface

The Sunbeam stainless steel cooking surface is manufactured from high quality stainless steel. Stainless steel is hygienic, easy to care for and extremely durable. To keep your stainless steel cooking surface looking good and to achieve the best results, follow these simple instructions:

Before the first use

“Season” the cooking surface by applying a thin coat of cooking oil or butter and rub in with paper towelling. This will also be necessary after cleaning in a dishwasher.

Use of metal utensils

Continued use of knives, forks or spoons will eventually start to mark the stainless steel cooking surface. We recommend using nylon or wooden utensils to maintain the polished surface finish.

To clean after each use

Wash in hot soapy water. Rinse and dry thoroughly. To remove cooked-on food, fill the wok with hot water and allow to stand for a few minutes. This will soften the food, making cleaning easier.

Note: Never fill a hot wok with cold water.

Removing burnt-on food

Fill the wok with sufficient water, cover and simmer for five minutes or until the burnt-on food softens and lifts. For stubborn burnt-on food, leave the wok to soak overnight, after first simmering as described. Then wash and dry thoroughly.

Removing stubborn stains

We recommend that these can be removed by using nylon abrasive pads in conjunction with any brand of stainless steel powder cleaner on stubborn stains on the cooking surface only.

Note: Constant use of nylon abrasive pads, will affect the polished surface finish.

Rubbing a paste of bicarbonate of soda and water into the stained area is also helpful in removing stains. Wash thoroughly.

Note: Re-Season the cooking surface after using any of the above methods to remove stains.

Dishwasher-safe

Your stainless steel Wok is completely dishwasher-safe. The heating element is totally sealed so it is safe to fully immerse in water.

Cooking Techniques

Various cooking methods can be used to make a variety of foods in your Sunbeam Wok.

Stir-Frying.

Stir-frying is a quick cooking method conducted over very high heat. The Wok should be hot before adding oil or any ingredients. Be sure to maintain maximum heat when stir-frying, by cooking food in small batches. Use a tossing motion to ensure the food is evenly exposed to the heat.

Tips When Stir-Frying.

- Meat should be cooked in batches, approximately 150g per batch. This prevents the temperature of the wok dropping too low and also preventing the meat from stewing. Once the meat is cooked, remove it from the wok and continue cooking vegetables, sauce and noodles. Then return the meat to the wok to heat through.
- Vegetables and meat should be cut into uniform shapes and sizes before starting, as stir-frying relies on quick cooking for best results.
- Slice meats into thin strips (about 5cm) so that they can cook quickly.
- If stir-frying marinated meat strips, drain off excess marinade as it tends to boil, which toughens the meat.
- Ensure the oil has been preheated to the correct temperature before cooking. The best oil to use is a canola or sunflower oil. Traditional Asian oils used include peanut or sesame oils.

- Stir-frying is done quickly, the less cooking time, the less chance there is for the meat to toughen or overcook. This also keeps the food crisp.
- Do not use the lid when stir-frying as stir-frying is a method of dry cooking and the steam droplets will toughen the meat.
- Serve stir-fried foods immediately to retain their crisp texture.

Shallow Frying.

Shallow frying is a method used to cook and crisp foods in a small amount of oil. The food is cooked at a lower temperature so that a brown crust forms on the underside. The food is then turned over to brown the other side. Usually 1 cup of oil is sufficient for shallow frying.

Deep Frying.

Deep fried food should be crispy on the outside and tender inside. The food should be coated with batter or breadcrumbs and placed in hot oil.

Tips When Deep Frying.

- Preheat the oil to the desired temperature before adding food. Do not cover the Wok with the lid when deep frying. This will prevent foaming or splattering of oil from condensation droplets.
- Wipe moisture from foods to avoid any splattering or foaming of oil.
- Do not fill the Wok with more than 8 cups of oil. For best results use a vegetable oil.

Cooking Techniques

- Cook food pieces a few at a time. This prevents lowering the oil temperature and food from having a soggy crust.
- Drain the food on paper towelling as soon as it is removed from the oil.
- Always allow the oil to cool before removing from the Wok.

Steaming.

Steamed foods are tender and juicy retaining most of their nutritional value. Most foods respond well to steaming, especially fish and seafood. Place food on the steaming rack provided and place in Wok over simmering water or stock. Cover with Wok lid.

Braising and Stewing.

The Wok can be used to make your favourite stews. The lid should be left on when stewing.

Braising is a variation to stir-frying where liquid is added at the end of stir-frying and the ingredients are left to simmer, usually uncovered.

Care and Cleaning

Heat Control Probe.

If cleaning is necessary, wipe over probe with a damp cloth.

Do not immerse the Control Probe in water or any other liquid.

Storage.

Store the probe carefully in a safe place. Do not knock or drop it as this can damage the probe.

If damage is suspected, return the Control Probe to your nearest Sunbeam Service Centre for inspection. Refer to the back of your instruction book for Service Centre listings.

Wok, Base and Glass Lid.

The Wok, base and lid are fully immersible and can be washed in warm soapy water using a mild household detergent and a soft washing sponge.

They can also be cleaned in the dishwasher.

We recommend to wipe the Wok vessel out after each use with a paper towel to maintain the seasoning of the non-stick coating. This will also improve the non-stick performance of your Wok.

To Clean Steaming Rack and Tempura Rack.

Wash in warm soapy water using a mild household detergent. Rinse thoroughly and dry with a soft cloth before storing.
