PRIMERGY Server

Instructions

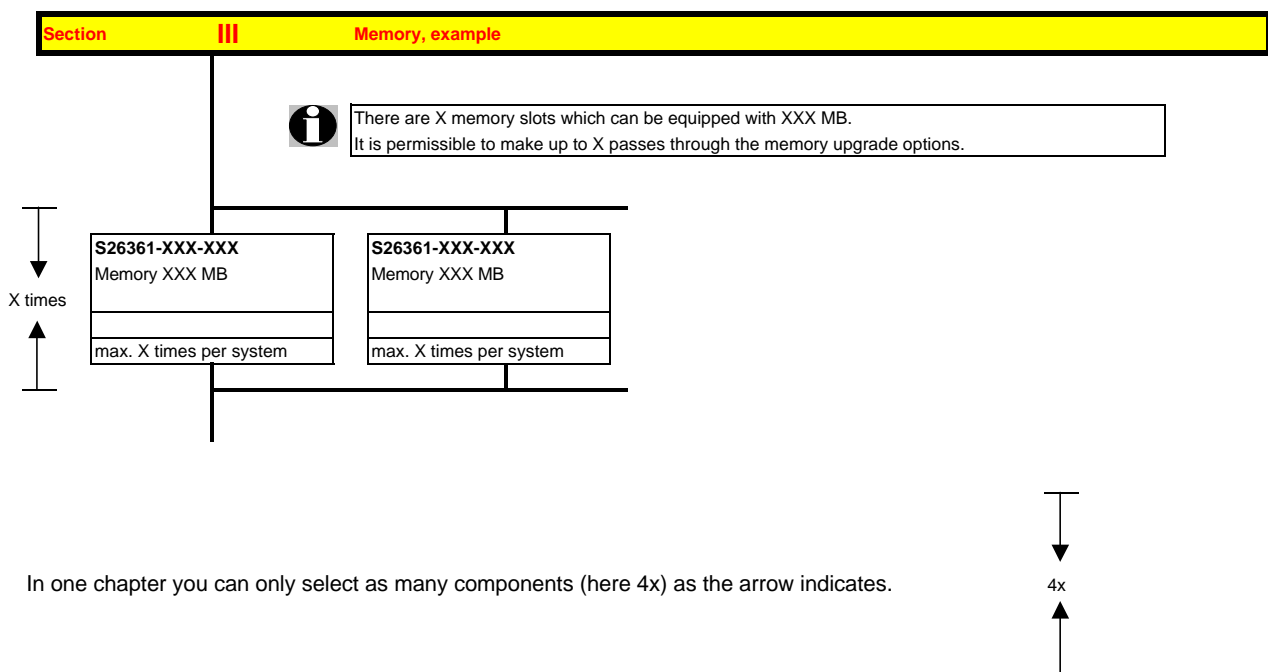

This document contains basic product and configuration information that will enable you to configure your system via PC-/ SystemArchitect.

Only these tools will ensure a fast and proper configuration of your PRIMERGY server or your complete PRIMERGY Rack system.

You can configure your individual PRIMERGY server in order to adjust your specific requirements.

The System configurator is divided into several chapters that are identical to the current price list and PC-/ SystemArchitect.

Please follow the lines. If there is a junction, you can choose which way or component you would like to take. Go through the configurator by following the lines from the top to the bottom.

In one chapter you can only select as many components (here 4x) as the arrow indicates.

Please note that there are information symbols which indicate necessary information.

Further information in the internet see:

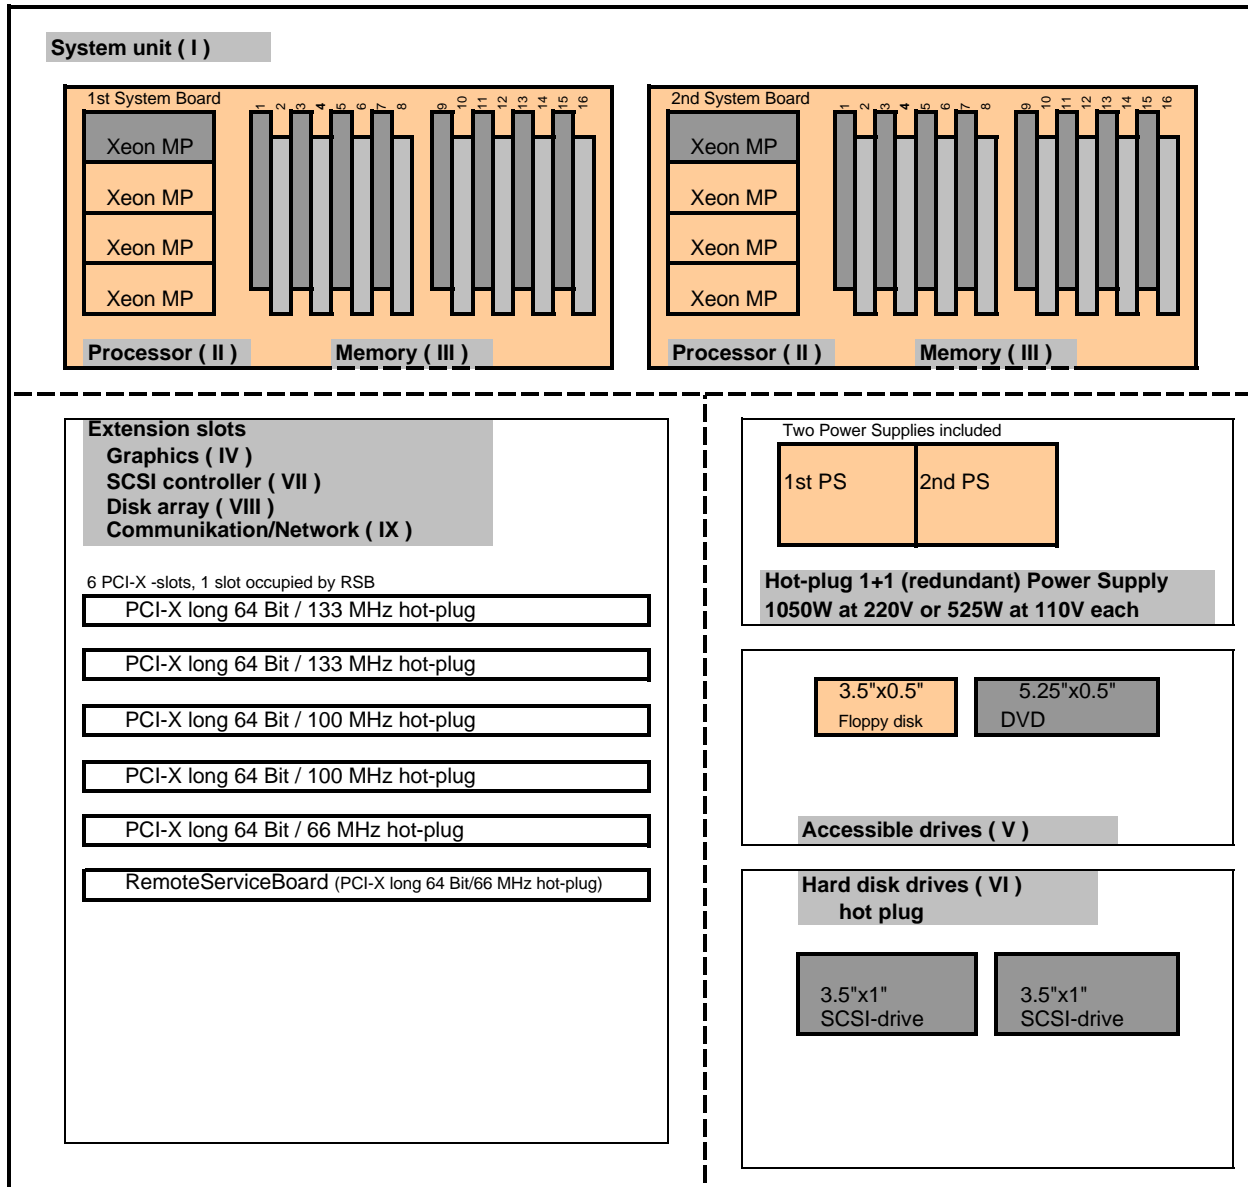

- <http://www.primergy.com> (internet)
- <http://extranet.fujitsu-siemens.com/primergy> (extranet)

Prices and availability see price list and PC-/ SystemArchitect. Subject to change and errors excepted.

**System unit consisting of:***** 4U rack mountable housing incl. 2 hot plug power supply modules redundant**

- temperature sensor for CPU module and FSC PDA function

*** 4 hot replace fans***** Drives / Bays**

- 1 drive bay 3.5"/0.5" high (occupied by 1 floppy disk)
- 1 drive bay 5.25"/0.5" high (occupied by 1 DVD-ROM)
- 2 bays for 1" hard disks
- 6 slots PCI-X 64 Bit (2x 133 MHz, 2x 100 MHz, 2x 64 MHz, (1x occupied by 1 RemoteView serviceboard))

Systemboard, to upgrade to 4 or up to 8 processors with:

- 2x Xeon processors, 100 MHz quad-pumped FSB
- 2-channel U160 SCSI controller on-board
- graphics processor on board 8 MB (PCI)
- LAN Controller 10/100/1000 on-board
- Fast-IDE controller (for DVD-ROM)
- RemoteView Serviceboard in a PCI slot

External Interfaces:

- 1x RS-232-C (serial, 9 pin)
- 1x keyboard (PS/2)
- 1x mouse (PS/2)
- 1x VGA (15 pin)
- 3x USB UHCI (1x front side)
- 1x LAN RJ45
- 3x SMP Interconnect
- 1x PCI extension
- 1x SCSI U160 (UHD68)

Cables:

1. IDE cable for CD/DVD
2. U160 SCSI cable for connection of the HD backplane
3. Power cord

Software:

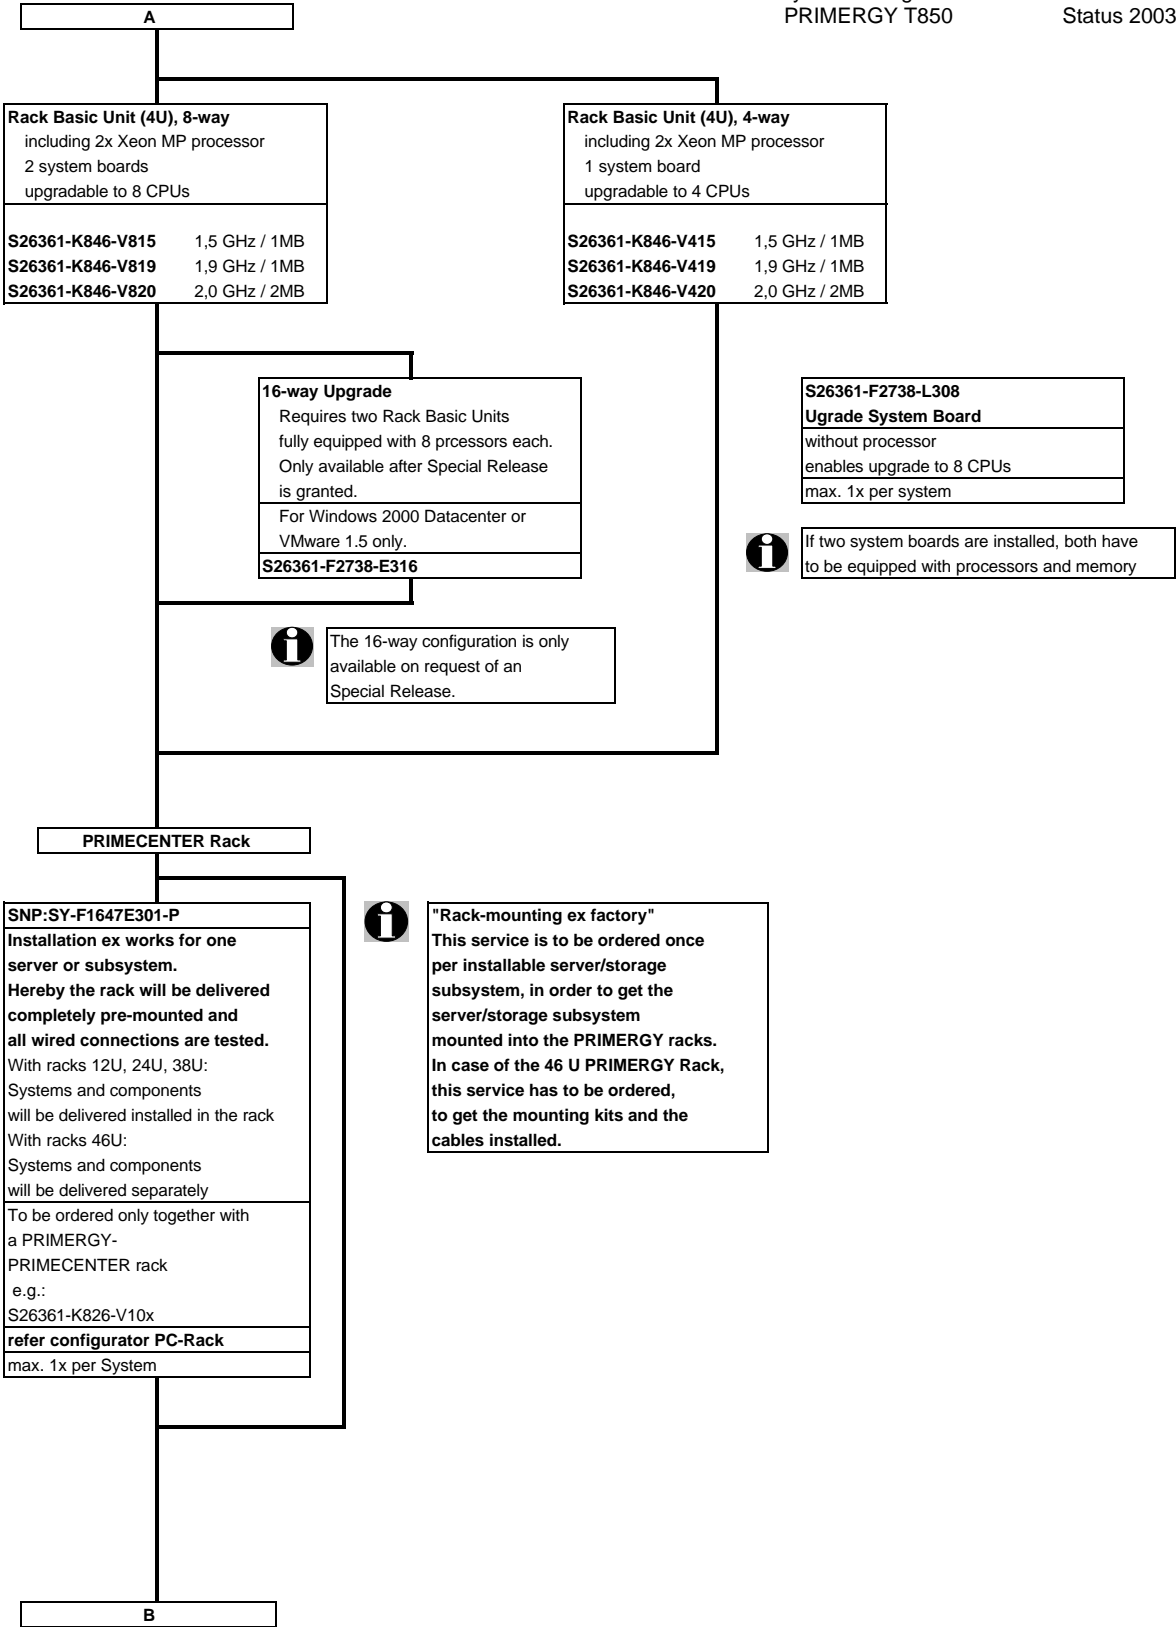

- ServerStart packet incl. ServerBooks CD, ServerSupport CD and ServerView

**Mounting kit for PRIMERGY T850 is part of the basic unit**

- 1 pair of telescopic rails (710-815mm)
- 1 pair of carrier rails
- 1 bracket PC-Rack
- 1 cable management PC-racks

**Mounting kit for mounting of servers in in FSC 19" PRIMECENTER- racks
and all server racks conforming to EIA standard EIA-310-D for 19" racks.**

Therefore the mounting kit is variable in depth from 710-815mm

B

Section II Processor

The PRIMERGY T850 can carry up to 2 system boards.
 The basic units include either one or two system boards.
 Please note that the basic units already includes two processors.
 Each system board requires at least 1 processor can be upgraded to max. 4 processors.

Only processors with the same clock frequency and the same third level cache (TLC) can be used.
 Terminators are automatically included if necessary.

For a multi-processor system a multi-processor operating system is required.
 Important: The necessary operating system license depends possibly on the number of the processors,
 e.g. with Windows 2000 Datacenter and the pertinent update subscription.
 Also with additional processor armaments it can be that the licensed CPU number is exceeded.
 Then an appropriate license must be ordered. See also for this W2k Datacenter Product Facts, chapter 5

Section III Memory

There are 16 memory slots available (4 banks with 4 modules each) on each system board.
 Mixing different modules within a bank is not support,
 therefore only complete banks with 4 modules are offered
 Each system board must be pupolated with at least 1 bank

 Memory mirroring functionality is possible as an option between banks

Section VII SCSI/Fibre Channel Controller

Inclusive
 The 2nd channel of the Dual-on-board U2W-SCSI controller can be used for external drives
 Included in the basic and system units.

i The two HD SCSI drives are connected to one on-board SCSI channel.
 The second on-board SCSI channel can be used for external devices.

Controller for the connection of an external storage system:

S26361-F2399-E1
 SCSI 160 controller
 Adaptec SCSI card 29160
 1 channel: LVD+Fast/Ultra (decoup.)
 LVD con. for HD, without cable
 Fast/Ultra con. access. drives

i Attention
 2Gbit/s FC Controller require other interface connectors for the optical cables than 1Gbit/s fibre channel.

i There are other components such as switches, GBICs or cables which can be ordered for fibre channel SAN attachments. (see price list)

i All controllers for the connection of external storage systems are delivered without cables.
 For the configuration of external cabling see the configurator for external storage systems.
 All internal cables and adapters are included within the basic units and components respectively.

 Adapter Plug RJ11/TAE
 Serial Interface cable DB25m / DB9f
 AC-Adapter w. German Power Cord
 occupies one COM port
 max. 1x per system
needed for RemoteView

i In connection with rack configurations the install variant of the modem (S26361-F1652-E4) has to be ordered (see rack configurator)

i **Options and other peripherals**
 For other options, refer to separate "Product specific options"
 These options are supplied lose with the shipment
 For suitable peripherals for this product, please refer to the section "Peripherals/communication"

i **Country specific power cords are not required for rack versions, except for USA&Canada. Power cords are shipped in a rack version with inlet connector for non-heating apparatus. Description in english. Both included in basic unit. (1x with Standard PSU, 3x with hot plug upgrade)**

i **T26139-Y1742-L10 USA, Canada**
 For shipments to USA&Canada, you have to order one power cord (1,8m, grey) per power supply.

Section XII PCI Extension Box

PCI Extension Box (3U)
 Upgrade from 6 to 12 PCI-X slots
 max. 1x pro System
S26361-K874-V406

PCI Extension Box Upgrade
 Upgrade from 12 to 18 PCI-X slots
 max. 1x per PCI Extension Box

SNP:SY-F1647E301-P
Installation ex works for one server or subsystem. Hereby the rack will be delivered completely pre-mounted and all wired connections are tested.
 With racks 12U, 24U, 38U:
 Systems and components will be delivered installed in the rack
 With racks 46U:
 Systems and components will be delivered separately
 To be ordered only together with a PRIMERGY-PRIMECENTER rack
 e.g.:
S26361-K826-V10x
refer configurator PC-Rack
 max. 1x per System

i **"Rack-mounting ex factory"**
 This service is to be ordered once per installable server/storage subsystem, in order to get the server/storage subsystem mounted into the PRIMERGY racks. In case of the 46 U PRIMERGY Rack, this service has to be ordered, to get the mounting kits and the cables installed.

Section VII SCSI/Fibre Channel Controller for PCI Extension Box

Controller for the connection of an external storage system:

S26361-F2399-E1
SCSI 160 controller
Adaptec SCSI card 29160
1 channel: LVD+Fast/Ultra (decoup.)
LVD con. for HD, without cable
Fast/Ultra con. access. drives
64/66 (32/33) PCI, min. 180mm
int: Fast 50-pin or Ultra HD68
+ LVD HD68; ext: HD68(LVD)
SW:
max. 2x per system

 not released for VMware ESX Server

S26361-F2843-E1
2GBit/s FC Controller
Emulex LP9802
1 Channel 2GBit/sec FC Controller
LC Interface for 50um Fiber
PCI 64Bit / 133MHz, 170mm
3.3V and 5V tolerant signaling
max. 4x per system

 There are other components, too, such as switches, converters or cables which can be ordered for the fibre channel (see price list)

 All controllers for the connection of external storage systems are delivered without cables. For the configuration of external cabling see the configurator for external storage systems. All internal cables and adapters are included within the basic units and components respectively.
